

Electricity bill savings could pay
for your new compressed air system*

IT'S A NO BRAINER

Many of our customers are benefiting from a new compressed air system paid for by their electricity bill savings. It really is a no brainer!

1. **A Compressed air system audit** indicates how much power can be saved when you install an energy efficient Atlas Copco compressed air system.

*Typically this may show **a cost saving of up to 50%**, which could be as much as **£65 per week!*****

2. **Install a new Atlas Copco GA11VSD+** from only £64/week for purchase or lease (includes maintenance & warranty over 5 years)
3. **Result** a new reliable compressed air system, occupying less space than the old one and paid for by your electricity supplier !
